CARIAN PEREZ

Tampa, FL | carianjperez@gmail.com | linkedin.com/in/CarianPerez

Product Manager who builds things from scratch and sees them through. Former Xbox PM at Microsoft across firmware, platform, and hardware partner work, now running Roll Call, a microbakery selling through Square Online and pop-ups. Uses AI daily to research, prototype, automate, and build working tools.

SKILLS

Product: Product Strategy, Roadmapping, Prioritization, Requirements, Experimentation, Customer Research, Data-Driven Decision Making, Stakeholder Management, Agile

Technical: SQL, Python, C#, KQL, HTML/CSS, APIs, Azure, Git, Telemetry

Tools: Claude, Copilot, Square, JobTread, QuickBooks Online, Azure DevOps, Jira, Kusto, VS Code, Jupyter

WORK EXPERIENCE

ROLL CALL BAKERY, Riverview, FL **August 2026 - Present**

Founder

- **Launched a cinnamon roll microbakery from zero to ~50 customers and ~1,100 followers across platforms in 3 months,** selling out 3 pop-ups by launching merch and marketing directly to 5K races, local service businesses, firefighters, and hospitals.
- **Fixed underpricing** by building an expense tracker with Claude covering weekly costs, sell-through, profit, cost per roll, and ingredient inventory, which drove a price increase.
- **Picked the product and market with research instead of guesswork,** using AI to compare a matcha concept against cinnamon rolls, benchmark local competitor pricing, and choose target customer segments before launch.
- **Tuned flavors and batch sizes pop-up to pop-up,** analyzing Square sales data with AI alongside social engagement and customer asks, and set up Square Online for pickup orders.

SUNBEAM CONSTRUCTION, Tampa, FL **September 2026 - Present**

Business Systems Lead

- **Moved a construction firm onto JobTread in 2 weeks with no playbook,** by learning the platform in a week, using AI to map and clean data while migrating 100+ jobs and schedules out of Buildertrend, and onboarding vendors.
- **Saved 4+ hours a week on bookkeeping,** by using AI to debug QuickBooks Online issues and integrate it with JobTread, and building templates and automations on JobTread's capabilities.

MICROSOFT - XBOX, Redmond, WA **May 2023 - September 2026**

Product Manager *August 2025 - September 2026*

- **Eliminated an 8-month launch slip on a flagship social feature,** by ramping up as sole dedicated PM in under a month, unblocking 5 teams across design and engineering, and writing the cross-org requirements doc that became the source of truth.
- **Kept a 7-person cross-functional team on schedule across 2 major milestones over 9 months,** while absorbing last-minute EU certification work by reallocating a developer and coordinating labs and partners across 4 countries to unlock EU market access.
- **Cut firmware regression risk for 2+ million Xbox controllers worldwide,** by analyzing user needs and authoring a rollout safety spec, tracked against defined success metrics, that aligned 4 stakeholder teams around one plan of record.
- **Saved a partner's firmware deadline with 3 months to spare,** by diagnosing the root cause of a blocking Gamepad API issue myself and coordinating a fix with their engineering team in 3 days.
- **Took on 2+ additional projects without added headcount,** by building Copilot and Claude into daily work, including an AI workflow that read Teams meeting transcripts and updated Azure DevOps tasks and dates, saving 15+ hours a week and cutting turnaround roughly 2x; ran a session to get fellow PMs using Claude Cowork.

Product Management Intern *May 2024 - August 2024*

- **Cut dashboard setup time from a week to a day for future rollout experiments,** by designing a Kusto telemetry dashboard that became the team's default template.
- **Cut latency 5% across 65% of Dynamic Resolution sessions,** by interviewing partner teams to pick the first experiment, then finding a race condition between server disconnections and format changes through a live experiment.

Explore Intern *May 2023 - August 2023*

- **Improved security for a developer gateway used by 230+ engineers,** by interviewing developer and security teams to define access requirements and implementing role-based access in Azure and C#.

EDUCATION

Indiana University Bloomington, Bloomington, IN **May 2025**

B.S. Intelligent Systems Engineering, Cyber-Physical Systems | Minor in Mathematics

LEADERSHIP

- **Microsoft SOMOS, Hispanic ERG, Intern Co-Lead:** built a weekly communication cadence and led intern program recruitment.
- **Microsoft Women in Gaming, Team Member:** helped plan and run 2 events for 50+ attendees on a 6-person organizing team.
