Carian Perez

Tampa, FL | carianjperez@gmail.com | www.linkedin.com/in/CarianPerez

SUMMARY

Product Manager with a track record of building and shipping internal tools, dashboards, and data-driven workflows across firmware, platform, and hardware partner teams at Microsoft. Uses Copilot and Claude daily to move from prototype to reliable, adopted tools, and brings structure to ambiguous, cross-functional problems by aligning stakeholders around a single plan. Comfortable owning projects from scoping through launch and iteration, translating complex, cross-functional findings for technical and non-technical partners alike.

WORK EXPERIENCE

Microsoft - Xbox Aug 2025 - Sept 2026
Product Manager *Redmond, WA*

- **Eliminated an 8-month launch slip on a flagship social feature,** by ramping up as sole dedicated PM in under a month, unblocking 5 teams across design and engineering, and authoring the cross-org requirements doc that became the team's source of truth.
- **Kept a 7-person cross-functional team on schedule across 2 major Xbox milestones over a 9-month program,** by owning milestone planning, requirements, and sprint prioritization across firmware, platform services, and console engineering.
- **Cut firmware regression risk for 2+ million Xbox controllers worldwide,** by authoring a rollout safety spec, tracked against defined success metrics, that aligned 4 stakeholder teams around one plan of record.
- **Saved a partner's firmware deadline with 3 months to spare,** by diagnosing the root cause of a blocking Gamepad API issue myself and coordinating a fix with their engineering team in 3 days.
- **Unlocked EU market access for an upcoming product,** by keeping EU trade, certification, and legal requirements on track, coordinating testing and logistics directly with external certification labs and partners across 4 countries.
- **Freed up capacity to take on 2+ additional projects without added headcount,** by building Copilot and Claude into daily workflows, saving 15+ hours a week on spec drafting, debugging, and status reporting, and cutting deliverable turnaround roughly 2x.

Microsoft - Xbox May 2024 - Aug 2024
Product Management Intern *Redmond, WA*

- **Cut dashboard setup time from a week to a day for future rollout experiments,** by designing a Kusto telemetry dashboard that became the team's default template for tracking rollout data and usage patterns.
- **Cut latency 5% across 65% of Dynamic Resolution sessions,** by digging into the why behind a critical bug and identifying a race condition between server disconnections and format changes through a live experiment.

Microsoft May 2023 - Aug 2023
Explore Intern *Redmond, WA*

- **Improved security for a high-traffic developer gateway used by 230+ engineers,** by defining technical requirements and implementing role-based access in Azure and C#, aligning it to Microsoft's least-privilege standard.
- **Placed 1st out of 17 teams in an internal security hackathon,** by using SQL injection techniques to identify and exploit a password vulnerability in a live database.

LEADERSHIP EXPERIENCE

Microsoft Women in Gaming Jan 2026 - Present
Team Member *Redmond, WA*

- **Helped plan and run 2 events for 50+ women in gaming as part of a 6-person organizing team,** strengthening community and culture by contributing to marketing, catering, decor, and day-of coordination.

Microsoft SOMOS Feb 2026 - Present
Hispanic Employee Resource Group - Intern Co-Lead *Redmond, WA*

- Built a recurring communication cadence and led recruitment for the Hispanic ERG's intern program, growing engagement through weekly content and Viva Engage outreach.

TECHNICAL SKILLS

Product: Product Strategy, Product Roadmap, Prioritization, Requirements, Experimentation, Data-Driven Decision Making, Cross-Functional Collaboration, Stakeholder Management
Technical: SQL, Azure, Python, C#, KQL, HTML/CSS, APIs, Git, Telemetry
Tools: Azure DevOps, Jira, Kusto, Copilot, Claude, VS Code, Jupyter

EDUCATION

Indiana University Bloomington
Bachelor of Science: Intelligent Systems Engineering; Concentration: Cyber-Physical Systems
